From the Principal's Desk...

**“Education is not the learning of facts,
but the training of the mind to think.”**

Albert Einstein

Welcome to Bill Gates Institute of Computer Science and Management.

As the Principal of the College, I feel honored and privileged to be part of an educational institution where every stakeholder is a learner and every day is an opportunity to learn and discover new things. The Scientific Research long back established that, ‘universe is expanding’ which holds true even today. And now we say ‘world is shrinking’- this also is True! The introduction of global network of internet has turned the whole globe in to a village. Only thing which is emerging fast in the current era is the applications of computers and management skills in the society.

Rapid progress in the area of Info-Tech and Management has brought about huge Leaps in socio-economic and cultural changes and consequently changed education system. The changing educational needs in the last decade have demanded the introduction of various employable courses at graduation and post graduation level. We at our institute focus our attention on overall personality development of the student and provide sound platform to be a successful I.T. / Management professional and a responsible Indian citizen. I am sure that, future will be ours as I.T. is India's Tomorrow.

Message from Head of the Department (Management Science)

Dear Students,

Science and civilization have made rapid strides especially in recent times and as a result, the world has gone a transformation. But behind all the progress of mankind is the human factor, the human capital – the skills, education and experience which are invaluable and irreplaceable. Several studies into economic growth in advanced countries have confirmed the importance of investment in human capital.

A country's physical capital is of course important ----- natural resources, minerals, dams, forests and industrial establishment. But about three fourths of the income even of advanced countries comes from human skills and the ability of the people, not from land, property rights and other permanent assets. Man exploits these assets through his capacity to create wealth and it is the capacity that makes all the difference between a rich, prosperous and progressive country and a poor and backward one.

India is rich and yet it is poor. It is rich in natural resources, mineral wealth, varied assets, rivers, forests, etc. It has a massive population also. There are lakhs of skilled workers too, but they constitute a small minority. There is no dearth of human capital in this country. As a result of the inadequate utilization of human resources, there is unemployment, illiteracy, malnutrition and poverty. Therefore, the human factor needs to be closely studied in relation to India. Mere numbers contribute very little to real human capital. It is education and training that count. Similarly, expenditure on education and training and improvement of health and research needs to be increased.

It is not only the inadequacy of attention and expenditure on developing human capital that needs to be remedied but it is the all-round development of the human personality, through sustained and concerted efforts that can help ensure the country's salvation. Mahatma Gandhi has said: "There are no two opinions about the fact that intellect rather than riches will lead. Character will count at the crucial time.

I welcome you in the portals of this institution.

Prof. Bagga Ashwinikumar

Facilities:

The Library

Our College has a well-equipped Library situated in the college building. College Library offers calm environment for study and reading away from hustle and bustle of the college. Keeping in view the need of modern education system an e-resource center is also created with computers and broadband facility is also available. The library has 3500 books on different subjects to fulfill the need of its users. To nurture the interest among students for current affairs and general knowledge the library has subscribed to 04 newspapers, 06 Journals. The library is computerized and it has Master software for easy management of its resources.

Library Rules:

- A student must bring his/her library card to get the books issued in his/her name.
- Only two books are issued to a student at a time for a period of 14 days.
- Reference Books/ Dictionaries/ Newspapers/ Periodicals will not be issued
- If the issued books are not returned by due date, fine at the rate of Rs.1 per book per day will be charged.
- In case of loss or damage of any issued book, it will either be replaced or its payment of present cost will be accepted with permission of Principal.
- Library Card is an important document student must carry every day. In case of loss of Card, an application to the Principal along with payment of Rs 50/-duplicate library-Card will be issued.
- Library Card should be collected from the Librarian as per schedule notified by the librarian.

Computer Labs

Keeping in view the growing importance of computers in professional courses, the college has established two well-equipped computer labs to keep the students abreast with the latest computer knowledge. The computers are Intel machines powered by the latest configuration. Our computer facility offers a wide range of software to cater to various academic needs. You'll have access to the latest Microsoft products, including Microsoft Office Suite, which includes Word, Excel, PowerPoint, and more. For those interested in software development and enterprise solutions, we provide the industry-standard Red Hat Enterprise Edition. The Labs have connectivity with access to the internet. The main computer lab has 40 computers in networking and there is an additional computer lab for students which have 25 computers with internet facility and networking. At the central computer facility, we strive to create an environment that fosters creativity, collaboration, and innovation.

Rules for Computer Lab

- 1) Lab computers are for academic and research use. Personal e-mailing, chatting and games are not permitted.
- 2) Setting of the computers should not be changed.
- 3) No personal CDs, Pen Drives and Memory Cards are allowed in computer lab.
- 4) Internet facility can be availed with the prior permission of a teacher.
- 5) Accessing prohibited sites may invite penalty or suspension from Lab/ College.
